MVC Patent Portfolio License Briefing*

*This presentation is for information purposes only. Actual license agreements will provide the only definitive and reliable statement of license terms.
Objectives

- Offer an alternative license for the convenience of users enabling them to acquire patent rights necessary for the Multiview Video Coding ("MVC") Standard from multiple patent holders in a single transaction rather than negotiating licenses with each of them individually
- License covers Multiple View MVC Video
- Align with MVC product value chain
- Enhance use of MVC across different business models
  - Royalty Caps to provide cost predictability
Coverage

• MVC includes two profiles for encoding and decoding 3D video content (Multiview High and Stereo High)

• On December 17, 2009, the Blu-ray Disc Association announced that MVC would be used as the standard for encoding and playback of 3D video on Blu-ray Discs. See http://www.blu-raydisc.com/assets/Downloadablefile/BDA-3D-Specification-Press-Release---Proposed-Final12-14-08version-clean-16840.pdf
Coverage

- Each patent is essential to the MVC Standard
- Patent holders submitted patents for evaluation of their essentiality by independent patent experts
- Worldwide coverage (including essential counterparts)
- Licensors include all essential patents
Coverage

• Attachment 1 to the License is updated regularly
  o See https://www.mpegla.com/programs/mvc/patent-list/

• New Licensors and essential patents may be added at no additional royalty during the current term; coverage for entire term

• MVC License coverage from January 1, 2010
